Forecast for Sunday 09 Jun 2024

Weather: Dry with clear skies overnight. Turning rather chilly, especially in low lying valleys and prone rural areas, with perhaps a touch of grass frost in places before dawn. A chilly and bright start to Sunday, with good spells of sunshine. However, it will be turning increasingly cloudy from the northwest during the afternoon, with some outbreaks of light rain and drizzle arriving by the evening period.

Chance of cloud-free hill tops above 600m: 90% throughout, but lowering from late afternoon onwards to be around 40% by midnight.

Low cloud and visibility: Cloud bases will remain above the summit during the overnight and morning period, but gradually lowering to around 500-600m by late-afternoon and into the evening. Visibility will be very good, with nearby hills clearly visible during the morning, visibility will become moderate or poor in outbreaks of rain by the evening.

Forecast for Monday 10 Jun 2024

Weather: A rather cloudy day, with outbreaks of rain, locally heavy at times, moving south-eastwards during the overnight and early morning period. Becoming largely dry, albeit staying mostly cloudy during the afternoon, with perhaps some late bright or sunny spells by the evening. Staying dry with clearer skies after dark.

Maximum wind: North to northwesterly 25-30mph, gusting 30-35mph at first, gradually easing to 15-20mph, with occasional gusts up to 25-30mph.

Chance of cloud-free hill tops above 600m: 40% during the morning, improving to 95% by the afternoon and evening.

Low cloud and visibility: Cloud bases down to 600-700m early morning, lifting to above the summits into the afternoon. Visibility will be moderate or poor in early cloud and rain, becoming very good into the afternoon and evening.

Temperature: **Valleys:** Plus 02 Celsius, becoming Plus 15 Celsius
At 600m: Plus 03 Celsius, becoming Plus 08 Celsius.
Freezing level: Above the summits.
